Summary

Sole technical hire and AI specialist at The General Store, a mature-age final-year Bachelor of Artificial Intelligence student at UTS graduating in December 2026 with a Distinction average, and a freelance designer/developer. Available to start with four weeks notice.

Education

University of Technology Sydney (UTS) Aug 2024 – Dec 2026
Bachelor of Artificial Intelligence | Distinction Average *Sydney, NSW*

Experience

AI Specialist Sep 2025 – Present
The General Store *Surry Hills, NSW*

- Building a fault triage platform for 3D foot scanners across APAC, with the AI chatbot on **AWS Bedrock** in Sydney for data residency (**in progress**).
- Developed **Python** automation scripts eliminating **39 weeks** of manual construction documentation labour annually for the interiors and architecture team.
- Shipped agency-wide onboarding platform (TypeScript and **Vercel**), removing **80%** of hands-on admin, with an **LLM** assistant answering employee questions about the business.
- Trained **50+ staff** on AI tools and integration, taking adoption from near-zero to company-wide.
- Delivered generative video and image assets for major retail clients, including a TV commercial, saving **$100K+** in production costs within a month of starting.

Freelance UX Designer & Developer Sep 2024 – Present
Self-employed | bygeorgecoffee.com.au *Sydney, NSW*

- Pitched and won the cafe's first website in 2024 as sole designer, running discovery through stakeholder interviews, journey maps, and competitor analysis before designing the responsive UI in Figma.
- Approached the same client in 2026 with a rebuild proposal and delivered it end to end, covering design, front-end build, Stripe checkout, product photography, and owner handover training.
- Built the cafe's first online sales channel, configuring 20 products with Stripe checkout, and delivered from pitch to launch in two weeks.

Retail & Customer Service Nov 2018 – Oct 2021
Platypus Shoes *Sydney CBD, NSW*

- Exceeded individual KPIs by 20%+ through customer relationship management, trained new team members on POS and sales processes, and compiled daily sales reports.

Technical Skills

Languages: Python, HTML, CSS, SQL, Bash, Unix
ML & Data: PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, OpenCV, YOLO, ResNet
Generative AI & Automation: LLM APIs, LangChain, RAG, MCP, Claude Code
Cloud & Deployment: GCP, Docker, AWS SageMaker, Vercel, Supabase, Hugging Face
Tools: Git, Streamlit

Projects

LLM-Powered RAG Chatbot for UTS FEIT | *Python, LangChain, Ollama, Streamlit* | repo 2026

- Built and deployed a local RAG chatbot for UTS FEIT students over a curated knowledge base of UTS policy documents, student handbooks, and web-search tools.
- Evaluated accuracy and usability against real student scenarios covering enrolment, assessment, and campus queries.

Basketball 2D Court Mapping (CourtIQ) | *Python, YOLO26n-pose, OpenCV, React* | repo 2026

- Presented at the UTS Tech Fest 2026 AI Showcase.
- Reached **0.994 keypoint mAP50** (0.853 mAP50-95) on an 851-image court dataset.
- Fine-tuned a **YOLO26n-pose** network to detect 33 court keypoints per frame and fit a per-frame homography to project player positions onto a 2D court.
- Built the system end-to-end in a team of three, covering player detection, shot tracking, and court mapping inside an interactive React GUI.

Skin Cancer Detection CNN | *TensorFlow, ResNet50, scikit-learn, Python* | repo 2025

- Built a binary classifier on the HAM10000 dermoscopy dataset to detect malignant skin lesions.
- Compared a custom 4-layer CNN against a fine-tuned ResNet50 transfer learning model on precision, recall, and F1-score, applying data augmentation and early stopping to control overfitting.

J.A.R.V.I.S. Personal AI Operating System | *Node.js, Claude Code, REST APIs* | repo 2026

- Built a life-management dashboard that orchestrates a set of AI agents supporting daily operations as a full-time worker and full-time student.
- Added voice interaction (ElevenLabs TTS) and mobile access over a private Tailscale network.

Certifications

CodeSignal Path Certificate
Mastering Algorithms and Data Structures in Python *July 2026*

Commonwealth Bank Australia Forage
Data Scientist Simulation: data processing, API integration, and sentiment analysis *July 2025*

Deloitte Australia Forage
Data Analytics Simulation: Excel analysis, data preprocessing, and Tableau dashboard creation *July 2025*

Google Coursera
UX Design Certificate: user research, project management, and stakeholder communication *April 2023*
